CPS[®] miLOGISTICS

**Individualized product range. Tried-and-tested systems.
Holistic supplier integration.**

HOW DOES YOUR PRODUCT RANGE LOOK LIKE?

Your wide variety of needs in the areas of production, logistics and material management know almost no bounds.

They range from classical connection and fastening technology and DIN and standard parts to process and operating materials like personal protective equipment and chemical-technical products to special parts based on drawings and manufacturer-related parts like hydraulic fittings, pneumatic components, electrical components, clamps, seals, packaging material and tools.

The challenge here is coordinating a large number of orders, incoming and outgoing goods, invoice handling and master data management – not to mention communication with all different kinds of contact partners of countless suppliers.

How are we able to reduce this purchasing effort while making you even more successful?

The answer: CPS®miLOGISTICS.

Your individualized product range, combined with tried-and-tested system technology – for all your suppliers. From one single source. Consistent service. Top quality.

THE WÜRTH RANGE

The broad and deep industrial product range of more than 1,000,000 items from Würth Industrie Service serves as the foundation. It consists of three pillars:

Standard parts

- DIN and standard parts
- Connection elements
- Fastening technology
- Screw and plug connections
- Protective equipment
- Chemical-technical products

Special parts

- Special parts
- Specially designed components
- Turned parts
- Stamped parts
- Milled parts

SERVICES

- ✓ Product support
- ✓ Technical support
- ✓ Quality responsibility
- ✓ Product liability
- ✓ Inventory
- ✓ Transport logistics
- ✓ On-site logistics service
- ✓ Invoice handling
- ✓ Complaint handling
- ✓ Merchandise planning
- ✓ Back office support
- ✓ Statistics
- ✓ Master data management
- ✓ Demand assessment

From one single source.

YOUR PARTNER FOR YOUR INDIVIDUALIZED PRODUCT RANGE

We have been working together with diverse partners on a variety of different product groups for years. This makes our specialist expertise and process reliability worthy of your trust. You can also rely on our logistical handling, comprehensive service and availability.

A selection of product groups in which we have been working together with select suppliers for many years can be found in the overview below. We would be happy to add other suppliers and product groups together with you.

HYDRAULIC COMPONENTS	PNEUMATIC COMPONENTS	ELECTRONIC COMPONENTS

YOUR BENEFITS

Supply chain management is not only possible for your C-Parts, but for other parts as well (including A- and B-Parts) through the CPS[®]miLOGISTICS concept: **One single source. One holistic concept.**

This gives you transparency over all your needs, enables merchandise planning and logistical processes to be automated simultaneously and provides for supplier bundling as well. As a result, you are able to concentrate on your core areas of activity in production, sales and inventory management. You too can benefit from this selection of systems!

CPS[®]miSTOCK: Warehousing and supplier integration through Würth Industrie Service

- Integration of additional products into existing processes
- Maximum security of supply and reliable delivery deadlines
- Reduced capital commitment and warehouse requirements in your own warehouse
- Fewer suppliers and consistent invoicing
- Avoidance of production downtimes
- Free capacity across the entire supply chain

CPS[®]miDROPSHIP: Supplier integration through third-party order processing using the Kanban system

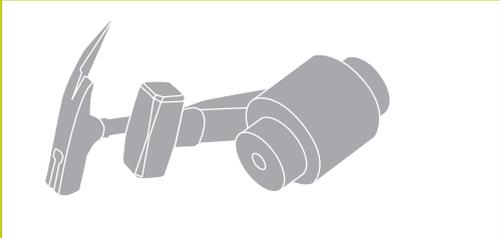

- Integration of additional products into existing processes
- Automated merchandise planning and stock management
- Reduced capital commitment and warehouse requirements in your own warehouse
- Comprehensive logistics service
- Fewer suppliers and consistent invoicing
- Avoidance of production downtimes
- Free capacity across the entire supply chain

CPS[®]miSELF: Independent management of products and suppliers using the Kanban system

- Integration of non-Würth products and product groups
- Utilization of innovative Würth system technology such as CPS[®]RFID for additional suppliers and products
- Maximum stock reduction and space utilization
- Maximum security of supply through simple, automated demand assessment and subsequent merchandise planning
- No change to purchasing conditions
- Holistic data management
- A variety of options for integration into your own process landscape
 - Basic: Independent reordering through digital provision of bin information
 - Advanced: Independent master data management and statistics through the use of a platform solution provided by us
 - Excellence: Supplemented by an interface connection and automated reordering

CPS®miLOGISTICS – MANAGING NON-WÜRTH PARTS

In addition to the holistic supply of standard and special parts through the Kanban system, we also handle the **management of your non-Würth parts and product groups.**

Management of non-Würth parts

- Hydraulic components
- Measuring technology
- Pneumatic components
- Clamps
- Sealing technology
- Packaging material
- Electronics
- Tools
- and lots more

Due to special regulations, specific QA inspections and excessive handling effort, not all items are included in the stockable, classic Würth product range.

With a variety of different services under the **CPS®miLOGISTICS** brand, we offer you the opportunity to provide these products together with our logistics and supply solutions. Our CPS®miLOGISTICS service concept includes the right version for every one of your needs. Get to know more about it!
